

Building and Marketing High Performance Homes

Presented by Marcus Bianchi
Sponsored by Owens Corning

Join us as Marcus Bianchi presents on building science based technologies, techniques and solutions for the Northwest that will help you build and sell high performance homes.

Learn more about:

- How the enclosure needs controls for water, air, and thermal management and the options you have in Washington codes
- How to significantly reduce moisture risk and improve air sealing with exterior insulation
- How Owens Corning and TRM provide marketing support to communicate your value to home buyers

Original Pancake House
26820 Maple Valley Black Diamond Rd SE
Maple Valley, WA 98038

Marcus Bianchi, Building Science Program Leader, Owens Corning

Marcus is responsible for developing sustainable solutions to deliver durable, comfortable, safe, healthy and energy efficient buildings. Examples of projects include roofing systems in metal buildings and livestock facilities, insulation of masonry and light steel and wood frame construction and acoustical performance of drywall partitions. Marcus is also involved in building code and standard development in Latin America and in the United States.
